REVIEWERS FOR *JOURNAL OF GREAT LAKES RESEARCH*, 1997

Most scientists understand the important role that peer review plays in making the scientific literature the valuable resource that it is. The *Journal of Great Lakes Research* is a peer reviewed publication and thus requests peer review by many different individuals during the course of a year. These reviewers are generally unsung, always unrewarded, and sometimes anonymous.

The following people have served as peer reviewers for one or more manuscripts that completed peer review during the time period covered by volume 23 of the *Journal*. On behalf of the IAGLR Board and its Publications Committee, I wish to thank all of them for their unselfish and timely contribution to the advancement of the science of large lakes.
